<span style="color: lightgreen;">■</span> Good Coverage	<span style="color: yellow;">—</span> Sec. Road	

**DISCLAIMER:** This survey is representative of the anticipated coverage from the Transmitter Site. Actual coverage may vary due to terrain, foliage, weather, interference and other factors. Even if an area is shaded, indicating coverage, it does not necessarily mean that there is complete radio coverage, in fact, there are numerous "no coverage" areas (including areas too small to depict) within the shaded areas. Wireless service is a radio technology that is subject to transmission limitations caused by service area limitations, customer equipment or its installation and other like conditions. In addition, service may be limited or suspended due to system capacity limitations or system repairs or modifications.
